

EL 12

EL 12 is the most compact freezer from Elcold. However, its capacity fully covers the needs for freezing in the small household.

Placed in energy class "B", the consumption is at a low level.

Therefore, the EL 12 is the right solution where space is limited and a good economy is requested.

The inside of the freezer is square, making it possible to turn the basket in either direction, and on the display you find the thermostat and two lamps. The display gives correct information over the freezer's status.

Gross volume / Net. volume	litres	110 / 110
Height / Width	cm	86 / 55
Depth incl. hinges / Excl. hinges	cm	60 / 55
Insulation thickness	mm	65
Energy classification		B
Freezer		****
Energy consumption at 18°C kwh/24 h pr. 100 l.		0,49 / 0,45
Energy consumption at 25°C kwh/24 h pr. 100 l.		0,70 / 0,64
Energy consumption at 25°C kwh/year pr. 100 l.		255
Freezing capacity	kg/24 h	6,5
Temp. rise from -18°C to -9°C	hours	30
Number of baskets / Lamps in panel		1 / 2
Ice-scraper		1
Defrost tray		-
Adjustable feet / Castors		2 + 2
Back condenser		+
