CBX - inclined curved sliding glass lids

The horizontal way of profiling your product

The horizontal way of profiling

Internal light is an option

The CBX can also be fitted with a lock

Baskets are available in three different

your product

Normally, bottle coolers are upright - at least that has been the tradition. So why change it?

Actually here are quite a few good reasons why:

- A chest cooler is easier to fill
- It offers a bigger advertising space, helping you to better profiling your brand
- The energy consumption is lower
- The cost per unit is significantly lower
- Chest coolers are easier to move
- They are robust and have a long service life

And if you try it yourself, you will surely come up with more good reasons.

Elcold offers a wide range of chest coolers, which can all be adapted to fit your logo colours. They come in sizes from 100 to 600 litres, covering practically every need.

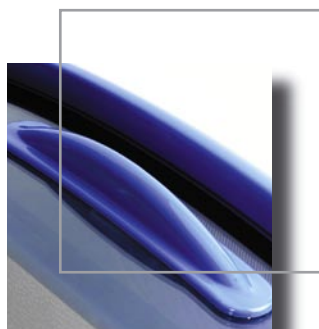

Please do also see the special CBX Delta leaflet.

So next time, you want to profile your brand, try to think horizontally, instead of vertically.

available in
sizes

Handles are available in
the same colours as the
frames

An easily readable
digital thermometer is
optional
